Does It Again!

A Bar Top Game That Actually *Fits* A Bar Top!

C I N E M A T R O N I C S

CINEMATRONICS has done it again with our new "Mini System" bar top/countertop game cabinet. Sleek with its new styling and gleaming stainless steel accent panels, the CINEMATRONICS Mini System Cabinet is perfect for all situations where space is at a premium.

You'll Flip Over the Monitor Mounting.

To ensure that the Mini System remains compatible with future CINEMATRONICS games, our engineers have developed an ingenious method for changing the monitor from the horizontal to vertical format—easily and *without changing the height of the cabinet!*

Small Footprint—Big Collections.

While the Mini System Cabinet is nearly 23 inches deep and wide (to allow for a generous monitor size), its 18-inch base requires minimal space so it can fit comfortably just about anywhere. And because the base swivels, more of your patrons can play those captivating, income-generating CINEMATRONICS games. And that means better collections for you!

Stainless steel accents make sleek, special cabinet styling makes it a true bar top piece. Will easily convert to upcoming CINEMATRONICS games

Unique mounting design makes changing the monitor from horizontal to vertical a snap—and without increasing cabinet dimensions!

The Hits Keep Coming.

The Mini System is currently available with either of two CINEMATRONICS hits, "*World Series—The Season,*" or "*Alley Master,*" the most realistic bowling game ever devised—both ideal for your type of patron. And you can be certain that your investment is sound as CINEMATRONICS prepares to unleash a whole new series of "cashbox stuffers," all designed to keep your Mini System collecting.

The Mini System Cabinet from CINEMATRONICS. The money-maker that fits almost anywhere.

MINI SYSTEM DIMENSIONS

21" high, 22.5" wide
23" deep, 18" swivel base
90 pounds
